1. ✓ VEB Elektromotorenwerk Hartha (Kreis Doebein) has started production of gyroscopes for navigation. At present, the plant puts out only one type, which has about the same characteristics as the former Askania K-13 gyroscope. As of mid-January 1954, the plant had produced one zero series of fifty units with the following characteristics: 110,000 centimeter grams per square second; rotating current three times 36 volts, 500 Hz; 18,500 rpm.
2. ✓ The Hartha factory plans to produce gyroscopes of all kinds in the future. At present, the demand for gyroscopes in East Germany is being investigated.
